

Multimedia Technology in Worship for the Church Volunteer 101 -- March 7 - 18, 2011 --\$75

This course has been approved by the General Board of Discipleship as an advanced course in Lay Speaking Ministries.

The use of multi-media technology in worship is growing at an exponential rate. Congregations of all sizes are acknowledging the gift of media technology; however very few have access to formal training.

[Rev. John Zimmerman](#) brings his 20+ years of pastoral ministry and his gift of implementing multi-media technology in worship to this seminar. Students will be introduced to the hardware and software in worship technology and discover their ability to plan, create and implement technology in a worship setting. The workshop will also help the student learn about worship itself and the role of technology in design, appropriateness and excellence. Special consideration will be given to budget and a low-cost approach to technology implementation. This workshop is designed for the church volunteer or pastor who would classify themselves as “beginners” in multi-media experience. (Please note that since the workshop utilizes some software that is windows-based MAC users may find some limitations.)

<p>The course content will include:</p> <ul style="list-style-type: none">Intro to Worship Theory<ul style="list-style-type: none">-Vision-casting, resources, structure-Budget-Projectors, computers, sound-Multi Media graphic resources-Worship presentation software

Biblical Storytelling I -- June 13 - 27, 2011

--\$50

This course has been approved by the General Board of Discipleship as an advanced course in Lay Speaking Ministries.

Learning the sacred stories of Scripture by heart and sharing them with others is both an ancient-future art and a powerful spiritual practice. This workshop's methods, developed by the Network of Biblical Storytellers International, are for everyone who wishes to learn, to tell and to connect with God and other people through sacred story – yes, you can do it too! By the end of the two-week workshop you will be able to share at least one text with others by heart, and you will understand how this completely non-technological art fits into a digital-communications world. Whether you work with children in Sunday School or dream of bringing Scripture to life in worship or elsewhere, your ministry and your spirit will be enriched by this art.

<p>This is a two-week introduction to the ancient-future art and spiritual discipline of <i>telling the sacred stories</i> of Scripture. Participants will learn to prepare, learn, and tell a Biblical text by heart (not “memory”) using the methods of the Network of Biblical Storytellers International. The workshop is taught by NBS member and United Methodist deacon Beth Galbreath.</p>
